

LIFE SAVING WATER THROUGH RECYCLING

Mission Statement: To save the lives of children (one dies every 15 seconds from preventable, water-related diseases) through raising money by recycling plastic bottles and aluminum cans to cover the cost of digging wells in third world countries.

How: By collecting plastic bottles and aluminum cans throughout the week and bringing them on Sundays to the Bear Creek **WATER** Drop Off conveniently located next to Portable C. A Bear Creek **WATER** Volunteer will be standing ready to unload your recyclables before and after each service.

I want to be part of Bear Creek **WATER** by:

- bringing in my plastic bottles and aluminum cans on Sundays
- asking my friends, neighbors, relatives, employers, social organizations, sport teams, etc. to save recyclables which I will bring to church on Sundays.
- volunteering one Sunday a month to unload and sort recyclables before/after service
- supporting this mission project anyway I can—contact me
